Description

The Excav8 Subsea compensator range allows for the storage of incompressible fluids used in subsea operations.

They provide a positive working pressure for your hydraulic circuit preventing sea water ingress.

Our tools have been designed by ROV technicians who understand how important it is to have an easy to integrate and operate systems.

We have a range of larger volume units available.

Excav8 can supply a range of additional equipment to support operations such as dredge pumps, dirty work packs, intelligent valve packs, excavation skids for an easy plug and play solution.

Overall Specifications	
Pressure Full Charged	9.6 PSI
Standard PRV Setting	14.5 PSI
Volume	270ml
Dimensions: L x H x W (full)	329 x 112 x 112mm
Weight in Air / Water
